Helping you get back to the things that matter

Nurtec® ODT (rimegepant) is the only migraine medication that can treat or help prevent migraine attacks.

With 2 different ways to use Nurtec ODT, you and your healthcare provider have the flexibility to choose how it could best help you.

TREAT

Nurtec ODT can be taken as soon as a migraine strikes to help stop pain and other symptoms.*

HELP PREVENT

Nurtec ODT can be taken every other day to help prevent migraine attacks.

*Light sensitivity, sound sensitivity, or nausea.

SELECT IMPORTANT SAFETY INFORMATION (cont'd)

Before you take Nurtec ODT, tell your healthcare provider (HCP) about all your medical conditions, including if you

- have high blood pressure
- have circulation problems in your fingers and toes
- have liver or kidney problems
- are pregnant or plan to become pregnant
- are breastfeeding or plan to breastfeed

Tell your HCP about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

“

I can use Nurtec ODT to treat or help prevent my migraine attacks, so my doctor and I can choose which is best for me.

See additional Important Safety Info on page 14 and Full Prescribing Info and Patient Info in pocket.

How it works

Nurtec® ODT (rimegepant) is a type of migraine medication that blocks a protein called calcitonin gene-related peptide (CGRP) from attaching to its receptor. This protein is believed to be one of the potential causes of migraine attacks.

Nurtec ODT is the only migraine medication of its kind that comes in an orally dissolvable tablet.*

Dissolves in seconds

*Nurtec ODT is the only CGRP receptor antagonist available as an orally dissolving tablet.

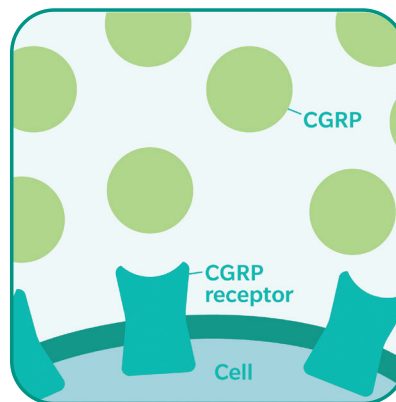

SELECT IMPORTANT SAFETY INFORMATION (cont'd)

Nurtec ODT may cause serious side effects, including:

Allergic reactions, including trouble breathing and rash. This can happen days after you take Nurtec ODT. Call your HCP or get emergency help right away if you have swelling of the face, mouth, tongue, or throat or trouble breathing. This occurred in less than 1% of patients treated with Nurtec ODT.

See additional Important Safety Info on page 14 and Full Prescribing Info and Patient Info in pocket.

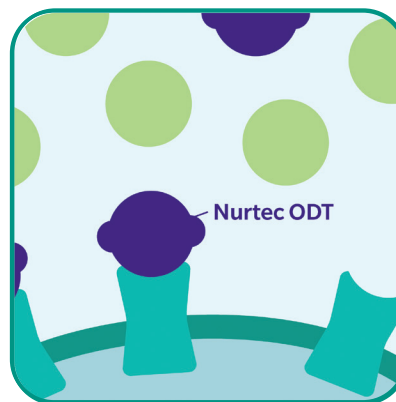

CGRP IN THE BRAIN

For illustrative purposes only.

CGRP is released during migraine attacks. These proteins attach to the receptors, causing nerve inflammation and increased pain signals to the brain.

NURTEC ODT BLOCKS CGRP RECEPTORS

For illustrative purposes only.

Nurtec ODT works by helping block CGRP receptors. This can treat and help prevent migraine attacks.

Rapid relief for when migraine strikes

A single dose of Nurtec[®] ODT (rimegepant) taken during a migraine attack:

Can provide freedom from migraine pain and symptoms* in 2 hours for some people.

Can keep migraine pain away for up to 2 days for some people.

*Light sensitivity, sound sensitivity, or nausea.

Acute Treatment

In a study of Nurtec ODT to treat migraine attacks:

Pain relief: 59.3% of people taking Nurtec ODT experienced pain relief at 2 hours postdose (vs 43.3% with placebo). Pain relief was sustained in 42.2% of people taking Nurtec ODT at 48 hours (vs 25.2% with placebo).

Pain freedom: 21.2% of people taking Nurtec ODT experienced pain freedom at 2 hours postdose (vs 10.9% with placebo). Pain freedom was sustained in 13.5% of people taking Nurtec ODT at 48 hours (vs 5.4% with placebo).

Freedom from most bothersome symptom:

35.1% of people taking Nurtec ODT experienced freedom from their most bothersome symptom (light sensitivity, sound sensitivity, or nausea) at 2 hours postdose (vs 26.8% with placebo).

SELECT IMPORTANT SAFETY INFORMATION (cont'd)

High blood pressure can worsen or occur after you take Nurtec ODT. Contact your HCP if you have an increase in blood pressure.

Jennifer F.

Actual Nurtec ODT Patient

Fewer monthly migraine days are possible

When taken every other day, Nurtec ODT significantly reduced monthly migraine days in people taking Nurtec ODT (4.3 fewer days) vs people taking placebo (3.5 fewer days).

Preventive

In a study of Nurtec ODT to prevent migraine attacks:

Reduction in monthly migraine days (MMDs):

When taken every other day, Nurtec ODT can reduce the number of migraine days in a month. People taking Nurtec ODT experienced 4.3 fewer MMDs during weeks 9-12 (vs 3.5 fewer MMDs with placebo).

See additional Important Safety Info on page 14 and Full Prescribing Info and Patient Info in pocket.

Is it right for me?

Talk to your doctor to find out if Nurtec ODT is right for you. Be sure they know about all the medications you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

Consider your medical history

Nurtec ODT may be taken by people with stable heart disease or cardiovascular risk factors. These patients were included in clinical trials if they had no acute cardiovascular events 6 months before entering the trial.

Consider what medications you take

Talk to your doctor about all of your medications. You may be able to take Nurtec ODT with:

Oral contraceptives

Some antidepressants

Preventive medications for migraine

Other acute (or “rescue”) medications for migraine

SELECT IMPORTANT SAFETY INFORMATION (cont’d)

A circulation problem called **Raynaud’s phenomenon** can worsen or occur after you take Nurtec ODT. This can lead to your fingers or toes feeling numb, cool, or painful, or changing color from pale, to blue, to red. Contact your HCP if these symptoms occur.

Discover more about

Nurtec® ODT (rimegepant)

1. It is a non-narcotic treatment.
2. It is an oral dissolving formulation that may be helpful for people who experience nausea and vomiting.
3. It is an option for preventive treatment that is not an injection.
4. No drink or water is needed to take Nurtec ODT.
5. You may **pay as little as \$0** with the copay card. Terms and conditions apply. See page 12 for details.

Thanks to the pain relief I get from Nurtec ODT, I get to enjoy time with my family with less worry when another migraine will strike.

Getting started

Some things to know before you start taking Nurtec® ODT (rimegepant):

- Use dry hands to peel back the foil covering of the blister pack and immediately remove one tablet.
- Do not push through the foil or store the tablet outside the blister pack for future use.
- If you take too much Nurtec ODT, go to the nearest emergency room right away.
- The maximum dose of Nurtec ODT in a 24-hour period is 75 mg. The safety of using more than 18 doses in a 30-day period has not been established.

For full instructions on how to take Nurtec ODT, please see the Patient Information located in the back pocket.

Understanding insurance

Although most insurance plans cover Nurtec ODT, many require a prior authorization before they begin paying for it. Your doctor's office will submit additional information to your insurance plan to get approval. You may be able to help by:

- Ensuring your healthcare provider has your complete migraine medical history, including medications you have taken in the past
- Following up if you do not hear back about the status of your prior authorization

You may be eligible for a **\$0 copay**. Terms and conditions apply. See page 12 for details.

Call for personalized support

After your healthcare provider prescribes Nurtec ODT, Pfizer Migraine Patient Access Coordinators can help answer questions about insurance coverage, cost/savings, or prior authorization.*

SELECT IMPORTANT SAFETY INFORMATION (cont'd)

The most common side effects of

Nurtec ODT were nausea (2.7%) and stomach pain/indigestion (2.4%). These are not the only possible side effects of Nurtec ODT. Tell your HCP if you have any side effects.

Ready to take control of your migraine treatment?

Discuss these 7 questions with your healthcare provider. Your answers can help establish your treatment goals.

1. Are you satisfied with your current migraine treatment?
2. How many days per month do you experience migraine pain?
3. How long does the pain last, and how intense is it? Have your migraine attacks changed over the past 3-6 months?
4. What symptoms do you experience before and during a migraine attack?
5. What factors or events (eg, food, stress, menstrual cycle, light, high altitude, lack of sleep, etc) seem to trigger your migraine attacks?
6. What over-the-counter or prescription medications have you taken for migraine in the past?
7. Does anyone in your family experience migraine?
